Familiar With: React Native, Python,  
Django, Dart

### Tools

Android Studio, Git, Command Prompt,  
Sublime Text, Adobe Photoshop, Version  
Control, BlueJ

## EXPERIENCE/COLLABORATION

Digital Ocean in association with Github and Twillio had organised Hacktoberfest to promote open source contributions. I participated in Hacktoberfest 18 and was in the top 50,000 people. I was awarded with DigitalOcean, GitHub and Twillio

I and a developer named Dewansh Rawat from the same college are collaborating on shaping TitaniumOS into a reality. It's a project under development. It's a basic webOS which has multiple familiar apps like a memo, browser, music player, image gallery, search box, email, passwords keeper and a file storage system.

## PROJECTS

### TitaniumOS — worked with Dewansh Rawat

A web OS perfectly integrated with Memos, Music Player, Browser, Image Gallery, Search Box, Email Sender and Listener, Passwords Keeper and a File Storage System. The whole project was made keeping flexibility in mind.

Deployed at [titaniumos.herokuapp.com](http://titaniumos.herokuapp.com)

### Geekd

Geekd is a service where admins can post stuff related to a geeky world. Edit, Delete and creating new posts is really easy. The UI of geekd is really really easy to use, thus ensuring ease for admins and users both.

Deployed at [geekd.herokuapp.com](http://geekd.herokuapp.com)

### Scan-Q

Scan-Q is an attendance management system where students can scan the QR code and mark their attendance easily, by this applications I tried to ease the paper trail.

Deployed at <http://scanq.herokuapp.com>
